Pr **Lr** **Dn** **in**

Programming Languages:
Some experince in C#, C++, Python, HTML, CSS

I work in the space where logic and facts intersect with creativity and emotion. Design gives me endless opportunity to explore this blend.I feel most comfortable working in a team environment. Other visions and opinions are invaluable at every step. The feedback loop of review and revise is the path to excellence, and something that I always strive for. You can find my work on my website.
